

# AMMAR HAIDER

BI & Reporting Analyst Candidate — Power BI, Data Reconciliation, Financial Reporting  
Mechelen, Belgium | +32 466 40 93 24 | ammarnaqi561@gmail.com | Remote-ready

## PROFESSIONAL SUMMARY

Data and analytics professional with hands-on experience cleaning and organizing data from multiple source systems, building Power BI data models, and delivering KPI-tracking reports that stakeholders rely on for month-end and executive reporting. Comfortable reconciling BI outputs against source records to ensure figures are accurate to the cent and translating technical pipeline logic into clear documentation and training materials so client teams can run their own systems independently. Organized, remote-work-ready, and motivated to build deeper expertise in EPM platforms such as Oracle and SAP through hands-on project work, alongside a business/data analytics academic background.

## KEY SKILLS RELEVANT TO THIS ROLE

- Cleaning, organizing and validating data from multiple source systems ahead of reporting and analysis
- Building and maintaining data models and dashboards in Power BI, including layered (Bronze-Silver-Gold) structures for reliable, scalable reporting
- Creating and updating KPI-tracking reports for business stakeholders, with a focus on accuracy and usability
- Performing detailed reconciliations between BI tool outputs and source data/records to catch and resolve discrepancies
- Drafting clear, plain-language technical documentation so non-technical teams understand how reports and pipelines work
- Testing new pipeline and reporting builds to catch data mapping errors before go-live
- Monitoring automated data pipelines to ensure scheduled reports refresh correctly and on time
- Preparing training materials so client/business teams can manage their own reporting environment independently
- Strong Excel skills (lookups, data organization) and advanced SQL for exploring and validating data
- Comfortable spotting inconsistencies or errors across large sets of numbers, with an organized, self-managed approach to remote work

## TECHNICAL SKILLS

BI & Reporting: Power BI (data modelling, dashboards, DAX, Paginated Report Builder), Databricks SQL endpoints

Data & ETL: Databricks, PySpark, Delta Lake, Auto Loader, SQL (advanced), Python (Pandas, NumPy)

Data Quality & Reconciliation: Automated validation frameworks, referential integrity checks, source-to-report reconciliation, GDPR-aware handling

Office & Documentation: Microsoft Excel (lookups, data organization), Word, SharePoint, technical documentation, training material creation

Automation: Power Automate, GitHub Actions, Git, GitHub

## PROFESSIONAL EXPERIENCE

### **Analytics & Data Engineer, Project Role — June 2026 – Aug 2026**

*Estee Lauder Companies, Westerlo, Belgium*

- Cleaned and consolidated data from multiple source systems into a single structured (Bronze-Silver-Gold) model to support accurate, repeatable reporting
- Built an automated data quality framework with breach alerts, validating 99%+ accuracy before figures reached business reports
- Designed and delivered the Power BI reporting layer, including Paginated Report Builder, for 50+ business stakeholders tracking KPIs
- Documented data definitions and pipeline logic in plain language so metrics stayed consistent and understandable across teams

## **Data and Automation Intern, Site Hygiene Team — February 2026 - June 2026**

*Estee Lauder Companies, Westerlo, Belgium*

- Automated a fully manual reporting process that previously took 12 weeks into a single-click solution, using Power BI, Power BI Paginated Report Builder, and Power Automate
- Integrated an AI agent into the reporting workflow to automatically generate meaningful conclusions from report data
- Queried, validated, and reconciled large historical datasets in Databricks against source records before they fed into Power BI reports
- Worked directly with business stakeholders to refine KPIs and confirm report figures matched underlying source data

## **IT Support Engineer — April 2025 - Present**

*Intact Insurance, Antwerp, Belgium*

- Acted as a point of contact between technical systems and non-technical stakeholders, troubleshooting issues and documenting solutions for knowledge transfer

## **RELEVANT PROJECTS**

### **Customer Spending Insights - Data Modelling and BI Dashboard**

- Built a layered (Bronze-Silver-Gold) data model, then delivered BI dashboards segmented by product, country, and city so figures could be checked and used by business teams

### **E-Commerce Lakehouse Platform**

- Unified data from 5 source systems (APIs, streams, CSV, JSON, GitHub configs) into one structured environment, with automated quality checks (null validation, referential integrity) and incremental Power BI refresh

### **Power BI Analytics Dashboard, Special Olympics Belgium**

- Modelled raw organizational data and delivered a Power BI dashboard presented directly to the CEO, with data accuracy and usability as the priority

## **CERTIFICATIONS**

Databricks AI Fundamentals, Databricks, 2026

Microsoft AI Fest, Analytics and AI, Microsoft, 2026

Deloitte Data Analytics Virtual Experience, Deloitte / Forage, 2025

## **EDUCATION**

### **Bachelor of Business, Data Science, Protection and Security**

*Thomas More University of Applied Sciences, Mechelen, Belgium, 2023 - 2026*

Relevant coursework: Data Engineering, Database Systems, Statistical Analysis, Business Intelligence, Machine Learning, Python Programming

## **LANGUAGES**

Dutch: A2, actively progressing toward B1

English: Professional working proficiency
